Translational research - Wikipedia National Institute on Aging (NIA or AG) <http://> The NIAAA supports basic and clinical research to develop new knowledge in a wide variety of scientific disciplines, including immunology, genetics, molecular biology, imaging and engineering research with potential medical applications and facilitates **Progress in tuberculosis vaccine development and host-directed** Director of I3M (Immunology, Inflammation, Infectious Diseases and Microbiology) since 2008. Ebola (2014-2015) Previously head of the department of internal medicine at His research activity is directed at understanding the development of the His scientific career has always combined basic and clinical research. **Clinical Research Division Labs & Projects** Center for Immunological Science: Leading immunology research in the 21st development of the immune system, the Center for Immunological Science The center functions as a collaborative institute by integrating basic and clinical immunology. In addition, another research is directed toward the development of **Participant Biographies - Transforming Clinical Research in the** Yves Levy is a MD, PhD and Professor of clinical immunology. His research activity is directed at understanding the development of the immune system and its pathology. His scientific career has always combined basic and clinical research. From 20, Yves Levy was Vice-Dean of the Faculty of Medicine, **Engaging Basic Scientists in Translational Research - Federation of** Associate Dean for Research, Director of the Center for Stem Cell Biology In addition to directing the basic science research lab focused on chronic she was codirector of the Joint Clinical Immunology Laboratory of Barnes-Jewish Hospital Institute of General Medical Sciences Training, Workforce, Development and **Yves LEVY - VRI Vaccine Research Institute** The National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) is one of the NIAMS mission is to support research into arthritis, musculoskeletal and skin the training of basic and clinical scientists to carry out this research and the The Institute directed to include resources on juvenile arthritis and **Center for Immunological Science (CIS) Division of Basic Medical Course Descriptions Duke School of Medicine** The American Association of Immunologists (AAI). American American Federation for Medical Research (AFMR) (National Human Genome Research Institute/Antonio . developing translational research programs. goal-directed or applied science. among basic and clinical scientists in academe. **Areas of Research - Areas of Research - VCU School of Medicine** A research group was developed to pursue basic and clinical research in immunology with emphasis on AIDS. Appropriate space within the Guthrie Research **Immunology research: challenges and opportunities in a time of** The IHV is the first research institute in the U.S. to link basic science, population studies and clinical trials in an effort to develop new vaccines The Institute of Human Virology (IHV) was

co-founded and is directed by Robert C. Gallo, Honored With Robert C. Gallo, MD Endowed Professorships in Translational Medicine. **Partners - VRI Vaccine Research Institute** At the VA Medical Center, strength in various aspects of medical research has lung injury the Lung Biology Research Center is directed by Dean Sheppard. clinical and health care delivery research activities of the Institute on Aging at developed in conjunction with basic science and other clinical departments, **Scientific Advisors Five Prime Therapeutics** Keywords: education, physician-scientist, medical student research, mentorship It also means that our best clinicians must have, or develop, a scientific training programs into the medical school curriculum at a large academic institution. The Mount Sinai School of Medicine (MSSM) has a long history of basic, clinical, **MRC Human Immunology Unit - Weatherall Institute of Molecular** By taking basic immunological discoveries and translating them into patients, the Since 2010, the HIU has been directed by Professor Vincenzo mission of Human Immunology Unit (HIU) is to foster research in Human medicine programmes and clinical trials in vaccine development in **An Innovative Portfolio of Research Training Programs for Medical** Five Prime Therapeutics has developed proprietary high-throughput protein Vice Dean for Clinical Research in the Medical School, University of Minnesota. Dr. Blazar has directed preclinical basic and translational immunology and stem cell He directs the Clinical and Translational Science Institute and the Center for **Congressional Record: Proceedings and Debates of the Congress - Google Books Result** Professor Yves Levy is a specialist in immunology, a physician who is also a researcher and academic. His research activity is directed at understanding the development of His scientific career has always combined basic and clinical research. In 2011, he created the Vaccine Research Institute labex **Institute of Human Virology (IHV) University of Maryland School of IS5 FUNDING NUMBER2017** Group on Research Advancement and Development (GRAND Director of I3M (Immunology, Inflammation, Infectious Diseases and Microbiology) since 2008. Ebola (2014-2015) Previously head of the department of internal medicine at His research activity is directed at understanding the development of the His scientific career has always combined basic and clinical research. ITHS Benaroya Research Institute K Scholar Program Translational research often used interchangeably with translational medicine or translational In a five-stage scheme, T1 involves basic research, T2 involves pre-clinical and in preclinical studies, to the development of trials and studies in humans. Scripps Research Institute, Florida, United States, has a dedicated Partenaires - VRI Vaccine Research Institute BMRI: Feil Family Brain and Mind Research Institute The Department of Cardiothoracic Surgery uses clinical trials to evaluate the most importantly, develops basic and clinical information leading to the development of new and The Department of Microbiology and Immunology is comprised of a collegial community of Development of a Medical Research Institute Directed At Basic and Research into transplantation, stem cell medicine, orthopaedics and surgical oncology be at the international forefront of clinical developments in organ transplantation. Research ranges from basic molecular and cellular immunology to with support from the National Institute for Health Research Cambridge University Research - Department of Surgery With multiple core research facilities, established clinical registries and repositories, advanced technologies, The BRI K Scholar program is designed for career development of promising clinical/translational investigators in the immunology of type 1 diabetes. Applicants must have a license to practice medicine in the US. Departments Research Weill Cornell Medicine Yves Levy is a MD, PhD and Professor of clinical immunology. His research activity is directed at understanding the development of the immune system and its pathology. His scientific career has always combined basic and clinical research. From 20, Yves Levy was Vice-Dean of the Faculty of Medicine, Development of a Medical Research Institute Directed At Basic and Research in Infectious Diseases at Emory University School of Medicine. broad spectrum of research, including basic, translational, clinical, and epidemiologic sciences. research in HIV Immunology of host defenses and vaccine development Vaccine Center directed by Mark Mulligan, MD, conducts clinical research, Yves LEVY - VRI Vaccine Research Institute (1)Department of Immunology, Max Planck Institute for Infection Biology, (2)Division of Clinical Infectious Diseases, Medical Clinic, Research Research - Emory University Department of Medicine Dr. Alving then became a research investigator in the Division of Blood and Blood funds the development of new technologies for basic and clinical research, for Clinical Research, Director of the Duke Translational Medicine Institute . or directed a diverse array of high-impact clinical and basic research programs, Bulletin - Alumni Faculty Association, School of Medicine, - Google Books Result Basic statistical computations and introductory data analysis will be performed using R The emphasis is on general principles and issues in clinical research design. the development and critique of the methodological aspects of clinical research protocols and CRP 264 Introduction to Immunology in Clinical Research Yves Levy, new Chairman and Chief Executive Officer of Inserm In the NIH, the National Institute of Allergy and Infectious Diseases (NIAID) oversees the largest Basic immunology research also provides the critical discoveries and research areas or the

requirements for advanced development of medical . and clinical research that included research on immune-mediated diseases. MH-Hannover: Immunology Centre Hannover The focus of the Delaney Lab is the development and clinical translation of methodologies for the effort of Fred Hutchinson Cancer Research Center and UW Medicine. The Program in Immunology is focused on learning how immune cells Transplantation Biology combines basic and translational research directed at NIH AREA Grant Research Objectives - NIH Grants At the Immunology Centre Hannover, all basic research teams share the goal to and at the same time prevent autoimmune reactions directed against self. Institute for Toxicology and Experimental Medicine, the TWINCORE Centre for and Clinical Infection Research, and the Helmholtz-Centre for Infection Research to Basic research is conducted in the Center for Drug and Alcohol Studies, an NIH Center that is part of the Institute for Drug and Alcohol Studies. The Departments of Microbiology and Immunology, and Biochemistry and Molecular . NIHfunded clinical trials are directed at therapy for these infections.
