

## Behind the Screens: Nursing, Somology, and the Problem of the Body

This is an exploration of attitudes to nursing which explores why nurses work is belittled and taken for granted by the majority of other professions, if not by patients themselves. This is a sociological analysis of the substance of nursing by a nurse who has spent many years in the Australian nursing service. She explains why, in her view, nursing and nurses are frequently taken for granted. Moving on from obvious perceptions of nursing as womans work or dirty work, she focuses on the idea that nursing is peoples experience of embodied existence. It is a positive approach which instills the reader with a respect for nurses and their discipline.
