

Catalog of Teratogenic Agents

This reference work has been newly revised and expanded to present information on more than 2570 teratogenic agents in a ready reference format. The eighth edition contains approximately 1500 additions, of which 270 are newly listed agents. The catalogue emphasizes human data and covers pharmaceuticals, chemicals, environmental pollutants, food additives, household products and viruses. Special consideration is given to health conditions of the mother. Substances are listed alphabetically, and each entry briefly summarizes research procedures and results. As in previous editions, a complete list of references for each agent is included.
