

## Nursing Care of the Childbearing Family

This innovative text presents a treatment of childbearing content and an elaboration of the care delivery system, including cultural aspects, current research abstracts, and delivery of maternity care in the community. Organized according to phases of the childbearing cycle, the second edition emphasizes critical thinking in three kinds of decision making: ethical, diagnostic, and therapeutic; as well as the psychological, social, cultural, and economic aspects of the childbearing family. Undergraduate nursing students.
