

Drawn from conceptual, theoretical and practice perspectives, this work provides guidance through the broad realm of addictions nursing practice. Practical knowledge and skills that can be applied in a variety of settings by any nurse in any area of practice are included. Topics discussed include: prevention; screening/detection; assessment/diagnosis; detoxification; and sobriety-focused care. Common problems and current issues related to addictions nursing practice are also addressed, including ethical issues, cultural consideration, client dropout, and health-care policy and reform.
