

Histological Typing of Oesophageal and Gastric Tumours: In Collaboration with Pathologists in 8 Countries (WHO. World Health Organization. International Histological Classification of Tumours)

This is the revised edition of the WHO histological classification of oesophageal and gastric tumours. It reflects the important changes that have occurred since the first edition in the fields of lymphomas, endocrine tumours and the dysplasias as well as adding a number of newly described entities. It sets the international standard for the next decade.
