

# Maternal Mental Health: A guide for health and social workers

Based on the acclaimed Perinatal Education Programme, Maternal Mental Health was written for doctors, nurses and social workers caring for women before and after birth. Maternal Mental Health demystifies maternal mental distress and mental illness and provides a clear guide to supporting mental health in the perinatal period. Courses using this book equip healthcare workers with the tools they need to provide essential perinatal mental health care. It helps identify maternal mental illness and explains how to assist expectant and new mothers. It covers: introduction to maternal mental health identifying maternal mental illness making referrals for maternal mental illness how to help mothers with mental health problems special medical issues in maternal mental health special social issues in maternal mental health supplementary resources for assessing, referring and supporting mothers in the perinatal period. This publication is part of the Bettercare series which addresses the need for continuing education by providing self-managed learning opportunities to health professionals. This balanced and up-to-date guide to common and important clinical conditions can be used as a training course or as a reference manual for professionals and students.
