

Architects Guide to Running a Job (Butterworth Architecture management guides)

Best practice is the concern of this book. An architect has to be an administrator as well as designer, and smooth economical administration will provide the conditions under which client relations can be constructive and good design can be achieved. The book is divided into 76 short sections covering the entire process, from preliminary enquiries to final fees, each with a small flow chart showing who is involved and when. This sixth revised edition updates the contents in line with present day practice, bearing in mind the changes in terminology, technology, environmental demands and the legislative background. Ronald Green and Professor Ross Jamieson who writes the foreword to this edition, are both examiners for Part Three.
