It offers a single definitive source on fetal heart rate monitoring, with the description, characteristics, etiology, clinical significance, and intervention for every tracing. Written by an expert team including nurse-midwife and attorney Lisa Miller, perinatologist David Miller, and RN Susan Martin Tucker, this reference may be used in any location where electronic monitoring is employed for fetal surveillance, such as the labor and delivery suite, the antepartum inpatient unit or ambulatory care setting, and emergency departments and intensive care units caring for pregnant women.
