

Details, Technology, and Form (Asbuilt)

The AsBuilt series is dedicated to presenting recent examples of formal and material innovation in architecture through detail and technical drawings, diagrams, and photographs, as well as fabrication, assembly, and work-in-progress documentation. Details, Technology, and Form, the third volume in the series, explores the genesis of twenty-five projects built in the United States and Canada, many notable for their multi-disciplinary design process, all of which have contributed to the ongoing evolution of architecture as a synthesis of art, engineering, and craft. From designs inspired by responses to environmental and energy concerns to re-interpretations of regional precedents or transformations of pre-fabricated building systems, these projects are testaments to the range and reach of contemporary architectural technology. Details, Technology, and Form includes outstanding projects by the following offices: Herzog & de Meuron * Renzo Piano Building Workshop * Zaha Hadid Architects * HHF Architects Skidmore, Owings & Merrill * Richard + Bauer * Morphosis Architects * Ennead Architects * Rafael Vinoly Architects * Toshiko Mori Architect * Anmahian Winton Architects * SmithGroup Inc. Perkins Eastman * Selldorf Architects * Krueck + Sexton Architects * Ross Barney Architects * Kuwabara Payne McKenna Blumberg Architects * Bade Stageberg Cox * Choi Ropiha Figuera Weiss/Manfredi Architecture/Landscape/Urbanism * De Leon & Primmer Architecture Workshop * Smith-Miller + Hawkinson Architects * Robert Siegel Architects * Gray Organschi Architecture
