

Qualitative Nursing Research addresses many of the problematic issues in qualitative research. Leading qualitative methodologists from orientations in phenomenology, grounded theory and ethnography contribute chapters on their favourite issues, which also form the bases for the dialogues which alternate with each chapter. With the exception of a few chapters that describe a single method, the problems discussed relate to every qualitative nursing project: improving the use of self; examining ones own culture; some myths and realities of qualitative sampling; debates about counting and coding data; and ethical issues in interviewing.

Nurses Quick Reference to Common Laboratory and Diagnostic Tests, Childhoods Deadly Scourge: The Campaign to Control Diphtheria in New York City, 1880-1930, International Award-Winning Pools, Spas, & Water Environments III, Shaping Health Policy: Case study methods and analysis, Clinicians Guide to Laboratory Medicine: A Practical Approach, Colour Atlas of Histology, Chronic Intestinal Diseases of Dogs and Cats, An Issue of Veterinary Clinics: Small Animal Practice, 1e (The Clinics: Veterinary Medicine),
