

Grover Group, Inc. (GGI) offers this Hospital Compare eBook with scoring and ranking metrics of nine areas of hospital efficiency, as identified by Medicare.gov. These areas include, where available: 1) 30-Day Readmission and Death, 2) Associated Infections, 3) Consumer Satisfaction, 4) Outpatient Imaging Efficiency, 5) Patient Safety Indicators, 6) Pneumonia and Heart Attack Payments, 7) STAR Ratings, 8) Structural Measures, and 9) Timely and Effective Care. We evaluate these areas using the GGI BayeSniffer.com (TM) Hospital Ranking Algorithm, which we based on the book: Strategic Economic Decision-Making: Using Bayesian Belief Networks to Solve Complex Problems. (2013), which is published by SpringerBriefs. GGI offers these metrics as intelligence so that consumers can use the information to make informed healthcare decisions. Medicare provides these nine hospital healthcare metrics for over 4,000+ hospitals, but this presents the consumer with information overload and as a result, this prevents them from taking the next step, which is making optimal healthcare related decisions. The GGI algorithm completes the next step and provides a scoring and national ranking for each hospital. Consumers can now use this information as an additional tool in making healthcare related decisions.
