

This title is directed primarily towards health care professionals outside of the United States. There are many occasions in clinical practice when a picture will tell a thousand words. For all optometrists who would like to be able to show their patients simple, clear and high quality illustrations of procedures and conditions, **The OPTOMETRISTS PRACTITIONER-PATIENT MANUAL** is the answer. Moving through anatomy, spectacle lenses, abnormal conditions, contact lenses and binocular vision, this practical and durable handbook is an excellent chair-side aid for practitioners to help patients understand their ocular conditions. It can help you explain why specific tests are being advised or a certain optical aid is being prescribed. With full colour throughout and incorporating patient reading charts, this unique manual encourages patient understanding, patient compliance and loyalty whilst being a real time-saver for practitioners. No practice should be without it! The first practitioner-patient manual for optometrists Over 150 full colour, ultra-clear illustrations All common conditions covered Lie-flat binding for ease of use Laminated pages for robust long life Includes reading charts A truly invaluable tool to aid practitioner-patient communication
