Not illustrated. 1887 Excerpt: ...a favor on one who appreciates the form and matter of the Medical Brief. D. H. Burk, M. D. Webbers Falls, I. T. Answers to Inquiries. BY I. J. M. GOBS, A. M., M. D. Dr. Riley asks for treatment for eczema, and heart disease (I suppose he means hypertrophy from valvular insufficiency). If the doctor will give from two to five drops of tincture of arsenic, and alternate that with the tincture of lappa minor two ounces, and the tincture scrophularia two ounces, and the tincture of dulcamara two ounces; dose a teaspoonful before meals; and wash, as Dr. A. C. Woodruff advises, in Hebras Green Soap, and apply an ointment of vaseline and oil of cade, or the boric acid, he will cure his case. And for hypertrophy from valvular insufficiency of the heart, give ten or fifteen drops of cactus grandiflora, and five drops of tincture of digitalis, every three hours, to give the heart rest, and alternate with ten to fifteen drops of tincture collinsonia, every three hours, he will very much relieve his patient, and, if it be a recent case, he will cure him. Dr. J. W. France wishes information in microscopy. I have had long experience with a good microscope, made by Queen & Co., of Philadelphia. But microscopy is only learned by personal instruction. The microscope is essential in diagnosing many diseases, especially such as are caused by living entities, and the various affections of the kidneys and bladder. Dr. W. J. Reese calls attention to a case of convulsions that he treated with ten-drop doses of veratrum every hour, which is heroic treatment. I would ask the doctor to try ten or fifteen grains of chloral hyd. next case he has, before he either bleeds or gives ten drops of veratrum viride. Dr. Scott Culbertson
