

Here's a concise, comprehensive, and carefully structured introduction to the analysis of non-blood body fluids. Through six editions, the authors, noted educators and clinicians, have taught generations of students the theoretical and practical knowledge every clinical laboratory scientist needs to handle and analyze non-blood body fluids, and to keep themselves and their laboratories safe from infectious agents.

Rapid Microchemical Identification Methods in Pharmacy and Toxicology: Sulfonamides, Sulfones, Barbiturates, Hydantoins, Living with Decorative Textiles: Tribal Art from Africa, Asia and the Americas, Bone and Renal Failure: International Symposium, Antwerp, November 1986 (Contributions to Nephrology, Vol. 64), Community Case Management During an Influenza Outbreak: A Training Package for Community Health Workers (Documents for Sale), Interventional Radiology in Pain Treatment, Spinal Injections & Peripheral Nerve Blocks: Volume 4: A Volume in the Interventional and Neuromodulatory Techniques for Pain Management Series; ... Techniques in Pain Management),
